## We treat every project with the same care and attention as if it were our own.

We believe that in the construction industry, human values count for more than anything. Trust, respect, communication and integrity are essential to choosing the right partners on any building project. Over the years we have built strong and long-term relationships with owners, architects and general contractors by continuing to offer competitive pricing, custom-designed solutions and finished products we can all rely on.

Pollard Enterprises is a family-operated company with nearly 50 years experience delivering top-quality roofing solutions for commercial and industrial buildings.

Leo Pedra and Jamie Pedra provide a solid and integrated team approach to project planning and execution, where no detail slips through the cracks.

Based in Toronto and founded in 1963, Pollard has successfully completed more than 4,000 roofing contracts in the Greater Toronto region. We have a well-tenured team of 30 experienced professionals who enjoy working together to provide great customer service and top-quality results.

### ROOF INSTALLATION

When your project is a new build, Pollard will work closely with the design team to custom-create an original roofing system that meets the specific requirements of your project. From conventional asphalt and metal to innovative membrane systems, Pollard has the experience and the expertise to deliver the right product for your project.

### ROOF REPLACEMENT

The need to replace an old or damaged roof does not necessarily mean your operations must grind to a halt. Pollard understands the need for business continuity even while significant structural work is underway. We will organize an efficient and minimally disruptive replacement process for your roof.

### ROOF IMPROVEMENT

Pollard will provide a consultation service to examine your roof to see where restorations or improvements can be made, leading to greater heating and cooling, environmental or cost efficiencies.

### ROOF INSPECTIONS & MAINTENANCE

Care and proactive maintenance is the best route to long-term safety and greater value for your investment. Pollard will supply inspection and evaluation services to identify potential leaks, cracks or other problems that could lead to greater damage, safety concerns and expense down the road.

### GREEN ROOFING

Green roofs are growing in popularity as commercial and industrial building owners take greater action to support the environment and health of the communities around us. Pollard will work with your team to "green" your existing roof or design and install an entirely new green system.
